Anita Patel, MD · Spine · 300 Summit Blvd, Lakeside, ST 90311

Patient # SOA-48812

Patient: Dana Whitfield

DOB: 01/09/1984

Consultation — Assessment & Plan

Assessment: C5-6 disc protrusion with right C6 radiculopathy (M50.122). **Plan:** continue therapy; refer to pain management for a C5-6 epidural steroid injection if no improvement.

Causation: Within a reasonable degree of medical probability, the C5-6 injury is causally related to the 03/14/2026 MVC. Her January 2025 low back strain resolved and is unrelated to her current cervical condition.

Patient: Dana Whitfield

DOB: 01/09/1984

Follow-up — 08/21/2026 · Anita Patel, MD

Neck pain 3/10, intermittent; R arm tingling rare since the C5-6 ESI on 07/10/2026 at Bayside Pain Management. Exam: Spurling negative; sensation intact.

Summit Orthopedic Associates

Anita Patel, MD · Spine · 300 Summit Blvd, Lakeside, ST 90311

Patient # SOA-48812

Patient: Dana Whitfield

DOB: 01/09/1984

Follow-up — Assessment

Assessment: C5-6 disc protrusion with R C6 radiculopathy, improved. **Patient has reached maximum medical improvement (MMI).**

Future care: up to two additional C5-6 interlaminar epidural steroid injections over the next 24 months if symptoms recur, estimated at \$3,900.00 each.

Patient # SOA-48812

Patient: Dana Whitfield

DOB: 01/09/1984

Referral — 04/20/2026

To: Bayside Pain Management (Luis Romero, MD).

Reason: C5-6 disc protrusion with R C6 radiculopathy; consider C5-6 ESI if symptoms persist despite conservative care.

Anita Patel, MD
