RE: Claimant: Dana Whitfield · Insured: Grant Mercer · Claim No.: KM-26-0418823 · Date of loss: 03/14/2026

We have reviewed your demand of October 9, 2026. Our evaluation considered the following:

1. **Gap in treatment.** Your client had no treatment from May 14 to June 26, 2026 — 43 days. We question whether the pain management treatment after the gap is related to this accident.
2. **Prior condition.** The records show chiropractic treatment for the back in January 2025. We consider her complaints at least partly pre-existing.
3. **Chiropractic treatment.** Twenty-four chiropractic visits is excessive for a soft-tissue injury.
4. **Medical expenses.** We evaluate the amounts actually paid (\$5,736.40), not the amounts billed.
5. **Future care.** Future injections “if symptoms recur” are speculative.

Based on the above, Keystone offers **\$18,500.00** in full and final settlement of all bodily injury claims. This offer remains open for 30 days.

Sincerely,

Tom Reyes
